Nickel Heap Leaching Study

Report Available Now

- Published in 2010, this is a 72-page comprehensive analysis of heap leaching in nickel production.
- Commissioned by INSG and produced by Malachite Consulting of Australia
- Provides up to date information on all aspects of heap leaching
- Summarizes the various hydrometallurgical processes applied to nickel leaching
- Identifies current and future trends
- Analyzes the economic and environmental impact of the use of heap leaching, including CO₂ emissions
- Reviews the intellectual property aspects of the technology
- Highlights several nickel projects using heap leaching
- Includes information on challenges and risks
