Joint Project on Social Acceptance for Mineral and Metal Projects

Report Available Now

- This 62-page report on “Social Acceptance for Mineral and Metal Projects” has been prepared by the University of Queensland-based Centre for Social Responsibility in Mining on behalf the Metals Study Groups – the International Lead and Zinc Study Group, International Copper Study Group and International Nickel Study Group.
- While there is a focus on copper, lead, zinc and nickel the bulk of the report is relevant to all non-ferrous metals.
- The report is intended for all stakeholders with an interest in social acceptance and social responsibility in the mining and metals sector. Both local and national government agencies involved in regulating mining in their countries and industry representatives with an interest in leading practice in the mining industry can use the guide as a reference to gain an overview of the issues pertaining to social acceptance.
- The report notes that government stakeholders have a role to play in social acceptance through both private sector regulation and local representation and hence need to have a sound understanding of the issues facing their constituents.
- The report examines recent and current community acceptance issues on a project by project and country by country basis to see what lessons can be learnt and what best practice approaches can be identified. A number of relevant case studies are included.

Table of Contents

Chapter 1: Context, Concepts and Industry Overview	4
1.1 Base metals mining and processing: recent trends and social impacts	4
1.2 Targeted audience	9
1.3 Scope and context	9
1.4 Definitions and conceptual boundaries	15
Chapter 2: Social Acceptance: Recent Trends and Key Concepts	17
2.1. What is social acceptance?.....	17
2.2. The value of social acceptance	18
2.3. International best practice	21
Standards and Frameworks	21
Guidelines and Toolkits	24
Chapter 3: Social Acceptance through Good Engagement.....	26
3.1. Roles and responsibilities of government in stakeholder engagement	26
3.2. How does engagement help projects achieve social acceptance?.....	27
3.3. What are the principles of good engagement?	29
3.4. Key components of stakeholder engagement	33
3.5. Stakeholder engagement at different project stages.....	34
3.6. Dealing with engagement challenges.....	35
3.7. Engagement with special groups	39
3.8. Communication and reporting	42
Chapter 4: Building Social Acceptance by Managing Impacts and Sharing Benefits.	44
4.1. Roles and responsibilities of governments in managing impacts and sharing benefits	44
4.2. Managing social impacts.....	46
4.3. Sharing the benefits of mining and metals projects	49
4.4. Sustainable community development	57
Conclusion: Leading practice for consideration	60
Further reading.....	61
Academic literature	61
International Policy, Standards and Principles	61
Tools	61
Stakeholder Engagement – Identification and Analysis	61
Grievance Mechanisms	62
Participatory Development and the Mining Sector.....	62
